

# TIGER ROOM

The Tiger Room was the first trailer of the fleet. Designed using tiger velvet print on the walls (at 3 locations), the direction was for an opium den look (lol). It's an extremely comfortable room to sit in; nothing but compliments over the years from many people.

In August of 2010, the Tiger Room went through a complete overhaul. The outside of the trailer saw modifications to the rear whereas the doors were enclosed. New carpeting, lino, seating, tables, walls, equipment, a complete overhaul. The Tiger was converted into an HD only trailer.

A large editor's workstation is at the rear of the trailer with ample room. A complete Avid Media Composer 5 with full 8 channel audio output. Now the editor can play their cuts, in the trailer, to its complete capacity and on an almost 8' wide HD image. All the items are secured to the trailer making setup and teardown fast and easy. The trailer can be ready in about 5 minutes for use.

As with all of the trailers, all of the equipment is as safe as possible and secured for transportation. Being an air-ride trailer, having moved this trailer across this great country of ours a few times, nothing moves.

Unfortunately the pictures do not do the trailer justice. Since the moment the Tiger Room got its retrofit, there were never any 'glamour shots' taken. All of these pictures are just a basic reference. Nevertheless, it gives you a great idea of what this trailer is.

### Description

- Seating for 18+
  - 3 leather couches on risers for unobstructed viewing
  - Table at each couch with dual dimmable lights
  - 8 theatre style chairs
- Side entrance with platform
- Lighted entrance and walkway
- Curtain at entrance for the reduction of sunlight glare
- Powerful AC & Heating System
- Excellent Soundproofing
- Padded walls
- Custom decor
- Coat racks at the rear

### image Size

- 7'9" wide
- Same width for all ratios
- Adjustable lower masking
- High viewing angle

### HD Image Replication

- JVC RS-35U HD projector
  - 1920 x 1080(p)
  - 24p, 23.98, 23.976
  - HDSDI via AJA converter to HDMI
- Sony PVM series 20L5 monitor
  - Color corrected to lab specs
  - HDSDI via AJA
  - Black 'cozy' for non-use requirement

### Sound System

- Mackie VLX1202 Mixer
- 5.1 Dolby DTS Surround Sound
- Dual Bryston amps
- 18" Subwoofer
- Studio Grade Speakers

### Editor's Workstation

- Dual 22" computer monitors - DVI
- Alesis studio nearfield speakers
- Intel Quad core Mac w/ 1.2T
- All mounted on a spacious desk
- Executive leather chair
- Complete trailer controls at hand
- Storage cabinets for storage

### HD Playback

- Avid MC5 Adrenaline
  - Mojo DX
  - Presonus audio interface - 8 audio tracks
- Sony Blu-Ray Player

### Trailer Info

- Converted in 2001
- 38' Great Dane (1999) trailer (dry van style)
- Special road classification. Trailer does not require yearly DOT certification and/or commercial vehicle usage thus reducing the insurance required for this style of trailer.

- C-Way Power hookup at rear (certified) 100amps
  - Breaker panel with main shutoff
  - Wired for separated electrical use
    - Breaker for lighting
    - Breaker for AC
    - Breaker for A/V
    - Breaker for spare
    - Etc...
